

Felt Pond Tutorial

You will need :

MATERIALS:

2-3 different shades of green felt, approx. 10x8 in. each

Blue felt approx. 7x7 in.

Coordinating embroidery floss

TOOLS:

Iron (if using freezer paper)

Scissors

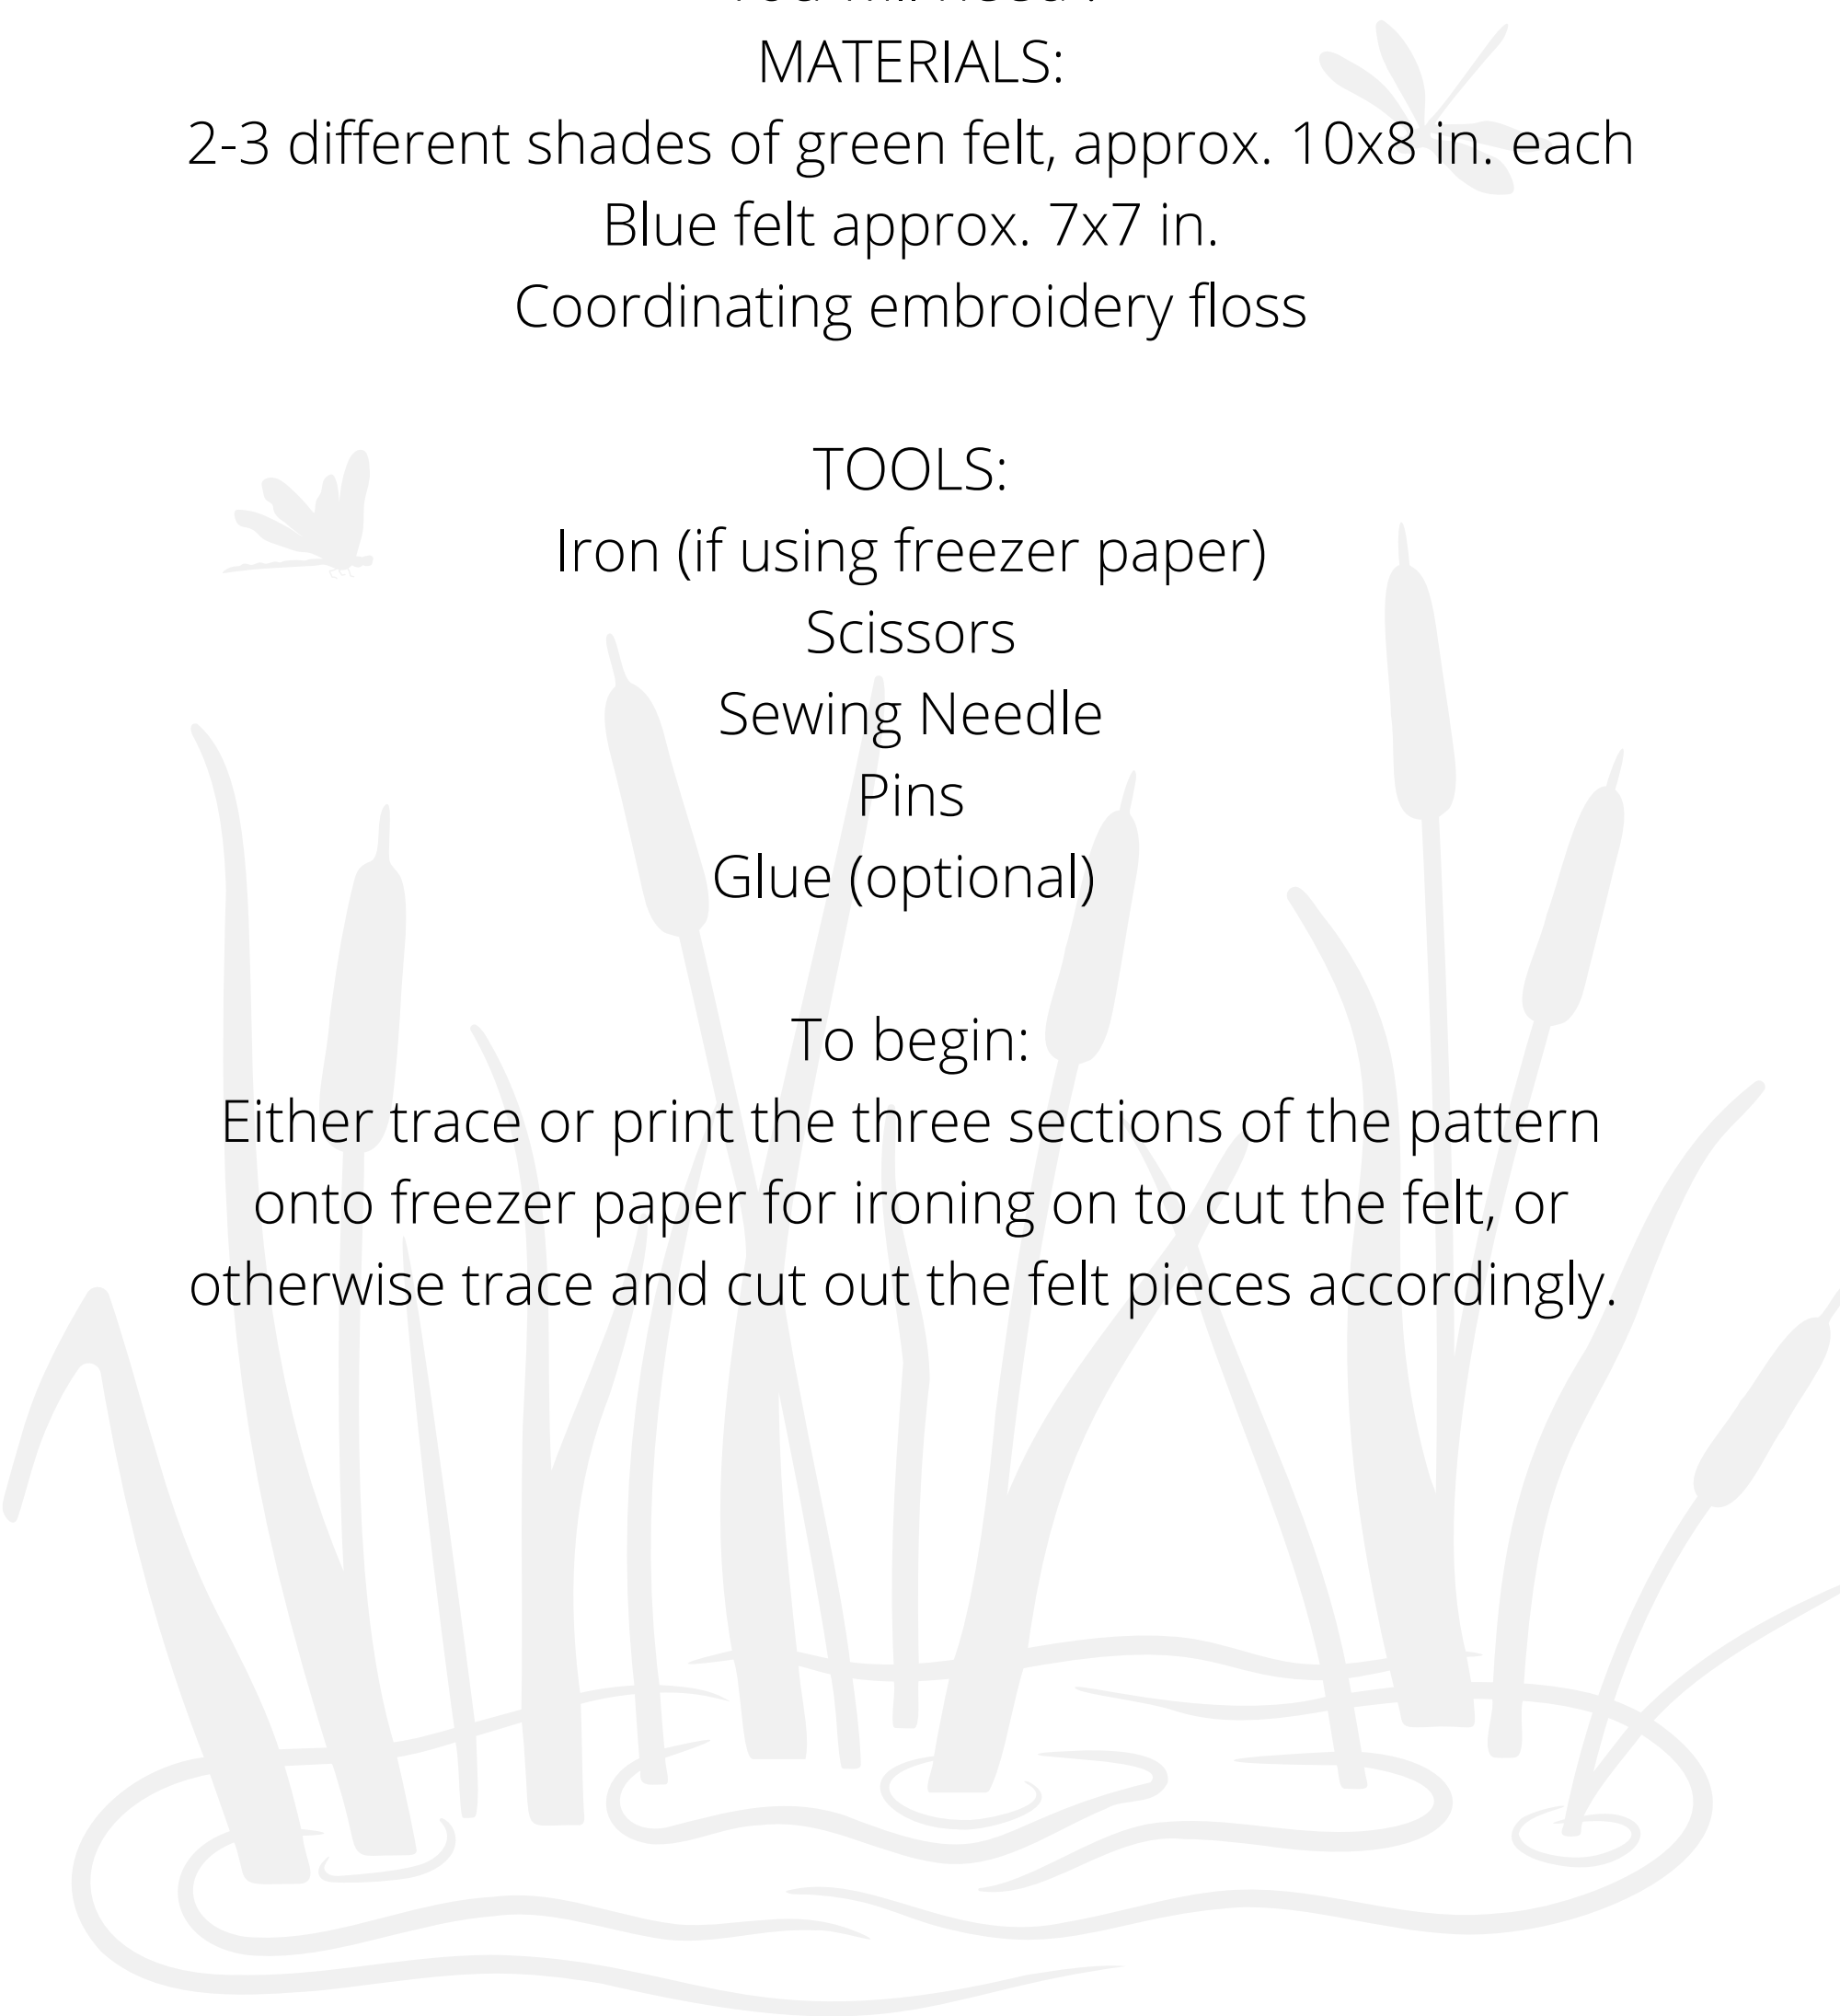

Sewing Needle

Pins

Glue (optional)

To begin:

Either trace or print the three sections of the pattern onto freezer paper for ironing on to cut the felt, or otherwise trace and cut out the felt pieces accordingly.

Felt Pond Tutorial

- 1 - Attach the lily pads to the front of the water piece, either with glue or stitching, and then add flowers or any other detail you'd like.
- 2 - Align the ring-shaped grass piece onto the water piece and pin them together.
- 3 - Attach the two pieces with 3 small straight stitches, starting from the top (in the water) and joining at the same point in the grass piece. End with a small loop around the bottom and continue around the pond at intervals.
- 4 - Align water piece onto the back piece and, bringing your needle through the back of the water piece so the tail doesn't show, stitch the two together. You can use whatever stitch you are comfortable with here - I used the {Blanket Stitch. } Bring the needle out the back to tie off, but before cutting, run the needle back through and pull the knot to the inside so it doesn't show.
